

Whom do you trust with servicing your most critical assets?

Boiler Services

Give your boiler plant new life and reduce operating costs

There are many ways to extend the lifetime of your plant to make sure it always performs at its best and stays an operational and financially attractive asset and adapted to environmental requirements.

Whatever project you have in mind for efficiency improvement or capacity increase of your boiler plant, we have you covered.

Our services include revision of small- and large-scale plants, conversions, chemical cleaning and preservation, built-in refractory constructions, emergency breakdown and special assignments.

Boiler Service offerings

Plant revisions

As an expert in maintaining boiler plants for high performance, our range of services cover everything. From simple repair jobs to extensive retrofits as well as installation of new components and control systems. We carry out a thorough revision in the shortest time possible and recommend renewals and repairs.

Conversions

We help with all types of boiler conversions, from one fuel to another, life-extending retrofits, such as replacing

drum and heating surfaces, and exchanging an old firing system with a new, efficient low-NOx firing system.

Built-in refractory constructions

We offer maintenance and retrofits for built-in refractory constructions and high temperature insulation as an integrated part of our service program.

Emergency breakdown

An unforeseen operational stop is always inconvenient and often results in costly operating losses.

BWSC's 24-hour emergency service offers immediate assistance, so the failure is located and repaired as fast as possible, minimizing operating loss.

Special assignment

We carry out all sorts of construction assignments involved in erecting plants, including drums, heat exchangers, conveyor plants and supporting structures, either as partial or turnkey contracts. We supply high and medium pressure piping systems for power plants, industries, and petrochemical plants.
