

The right
partner to bring
on board when
realizing projects

Green Energy Solutions

BWSC provides comprehensive solutions and services for power plants and green energy facilities worldwide.

Lifecycle Solutions Provider:

- Engineer and execute projects on time
- Technology integrator on full-scale projects
- Tailored Technical Service Agreements (TSA) and lifecycle management
- Operate and maintain facilities cost-effectively

BWSC has taken part in the green energy transition for decades (biogas, biomass-to-energy and waste-to-energy), so being a key player within emerging markets, such as carbon capture, hydrogen and hybrid solutions, is a natural next step to us.

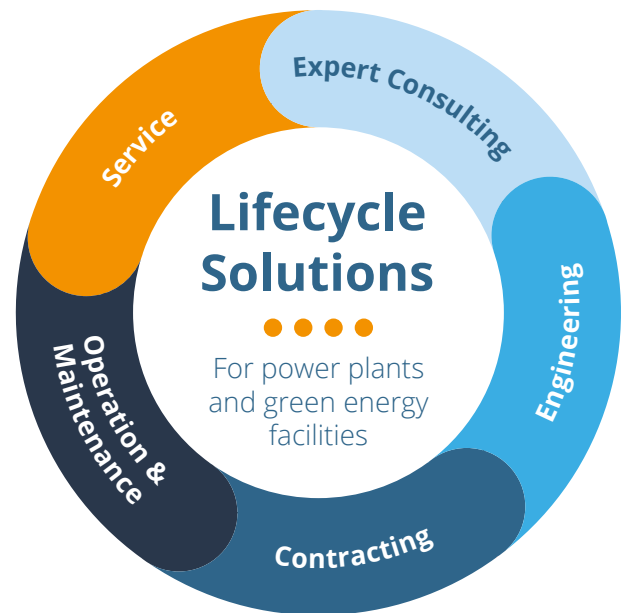

We are ready to discuss your project ideas and bring our strong expertise within engineering and project execution to the table. BWSC is technology agnostic and has worked with a vast number of technology suppliers over the years. We are confident that you will find us to be a strong technology integrator.

Green Energy Solutions

- Hydrogen & e-fuels (Power-to-X)
- Carbon capture
- Biogas
- Hybrid solutions
- Energy storage
- Fuel conversions

Continuing our engagement in the ongoing evolution of green energy solutions is part of our DNA.

We stand for:

Big picture perspective

- Reliability & performance
- Cleaner and longer living
- Greater business value
- More adaptable

Always your advocate

- Seek long-term partnerships with customers
- Understand customer needs
- Challenge assumptions
- Always recommend the best solution

Continuous improvement

- Help customers understand new technologies
- Provide guidance in decision-making
- Implement the chosen solution
- Make sure it delivers on its promise

Towards greener energy

- We take an active role in the green energy transition
- All power plants can lower emissions
- New technologies are the key

About BWSC

Headquartered near Copenhagen, Denmark, BWSC provides specialized consultancy, engineering, installation, operation and maintenance services at power plants and green energy facilities worldwide.

Forty years of experience with energy infrastructure, a diverse staff of seasoned experts, full technology independence and our big-picture approach make us uniquely able to help customers define their ambitions and reach them through expert design and continuous improvement of their facilities.
