

Keeping critical operations running in the Panama Canal region

Delivering fast, reliable technical support for vessels and industrial clients

Technical hub in the heart of the Panama Canal

BWSC Panama operates as a specialized service hub in the Panama Canal region, providing technical support to vessels in transit and industrial clients across the region. Strategically located along one of the world's most critical maritime corridors, the company delivers mechanical services, workshop capabilities, component reconditioning, spare parts supply, and rapid-response field support to ensure reliable and efficient operations.

As part of Burmeister & Wain Scandinavian Contractor A/S (BWSC), a Danish engineering company, BWSC Panama builds on decades of international experience and more than a century of Danish industrial and marine engineering heritage rooted in the historic Burmeister & Wain shipyard.

This global expertise forms the foundation for BWSC Panama's reliability-driven approach to supporting demanding marine and industrial operations throughout the region.

Integrated service portfolio

We provide specialized solutions across the following areas:

1

Reconditioning Services: 2- and 4 stroke engines, auxiliary equipment, generators and spare parts

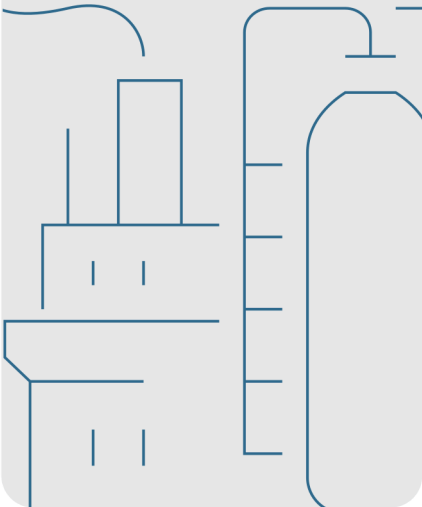

2

Special services: Rapid Service 24/7, turbochargers, Honing, PMI and Governors

Workshop and technical capabilities

Integrated lifecycle support

Beyond individual repairs, BWSC Panama takes a structured approach to supporting long-term asset performance. Through coordinated service planning and technical expertise, we help operators improve maintenance efficiency, reduce downtime, and maintain reliable operation of engine and auxiliary systems.

Your preferred service partner

Our workshop is equipped to carry out complex mechanical and welding processes under controlled conditions.

Our services include:

- Dedicated welding stations for heavy-duty components
- Precision machining equipment
- Dimensional inspection and measurement tools
- Controlled repair procedures aligned with OEM requirements

Commitment to high quality

All maintenance, repair, and overhaul work is performed in accordance with strict OEM requirements and controlled quality procedures. Our certified technicians and engineers ensure precise execution and full technical traceability throughout every stage of the process.

Strategically located and backed by decades of technical expertise, BWSC Panama delivers fast, reliable support for demanding marine and industrial operations.

Why work with us?

Local expertise, global engineering support, and OEM-aligned service solutions that help maintain reliable performance and minimize downtime.

Operational Excellence

Operating in the Panama Canal requires precision, responsiveness, and reliable execution. BWSC Panama is structured to support time-critical marine and industrial operations where delays are not an option.

By combining advanced workshop capabilities with rapid on-site and onboard services, we ensure efficient project execution, minimized downtime, and seamless coordination from planning through completion.
