Supporting vessels through the Panama Canal

BWSC

RAPID SERVICE 24/7

Technical scope supporting your engine driven power generation

Rapid Service 24/7 supports engine driven power generation systems and associated auxiliaries, including:

Engine systems

Two-stroke & four-stroke engines, auxiliary engines, generator sets, cylinders, pistons, liners, bearings and fuel injection systems.

Auxiliary systems

Lubrication oil, cooling water and fuel oil systems, pumps, filtration units and associated balance of plant equipment.

Air & turbocharging

Turbochargers, charge air coolers, intake manifolds and exhaust gas recirculating/piping systems.

Workshop & field support

Rapid component removal/reinstallation, accelerated workshop repair & reconditioning, emergency spare parts coordination and restart testing.

Why work with us?

Local expertise, global engineering support and OEM-aligned service solutions that help maintain reliable performance and minimise downtime.
